

STAINES ST16

16 TONNE TANDEM AXLE SILAGE TRAILER

Our Staines heavy duty tipping trailer has a carrying capacity of 16 tonne while holding a volume of 32 meters cube. Designed with bevelled edges, this helps eliminate any recess areas, which in turn eliminates any material gathering on the structure.

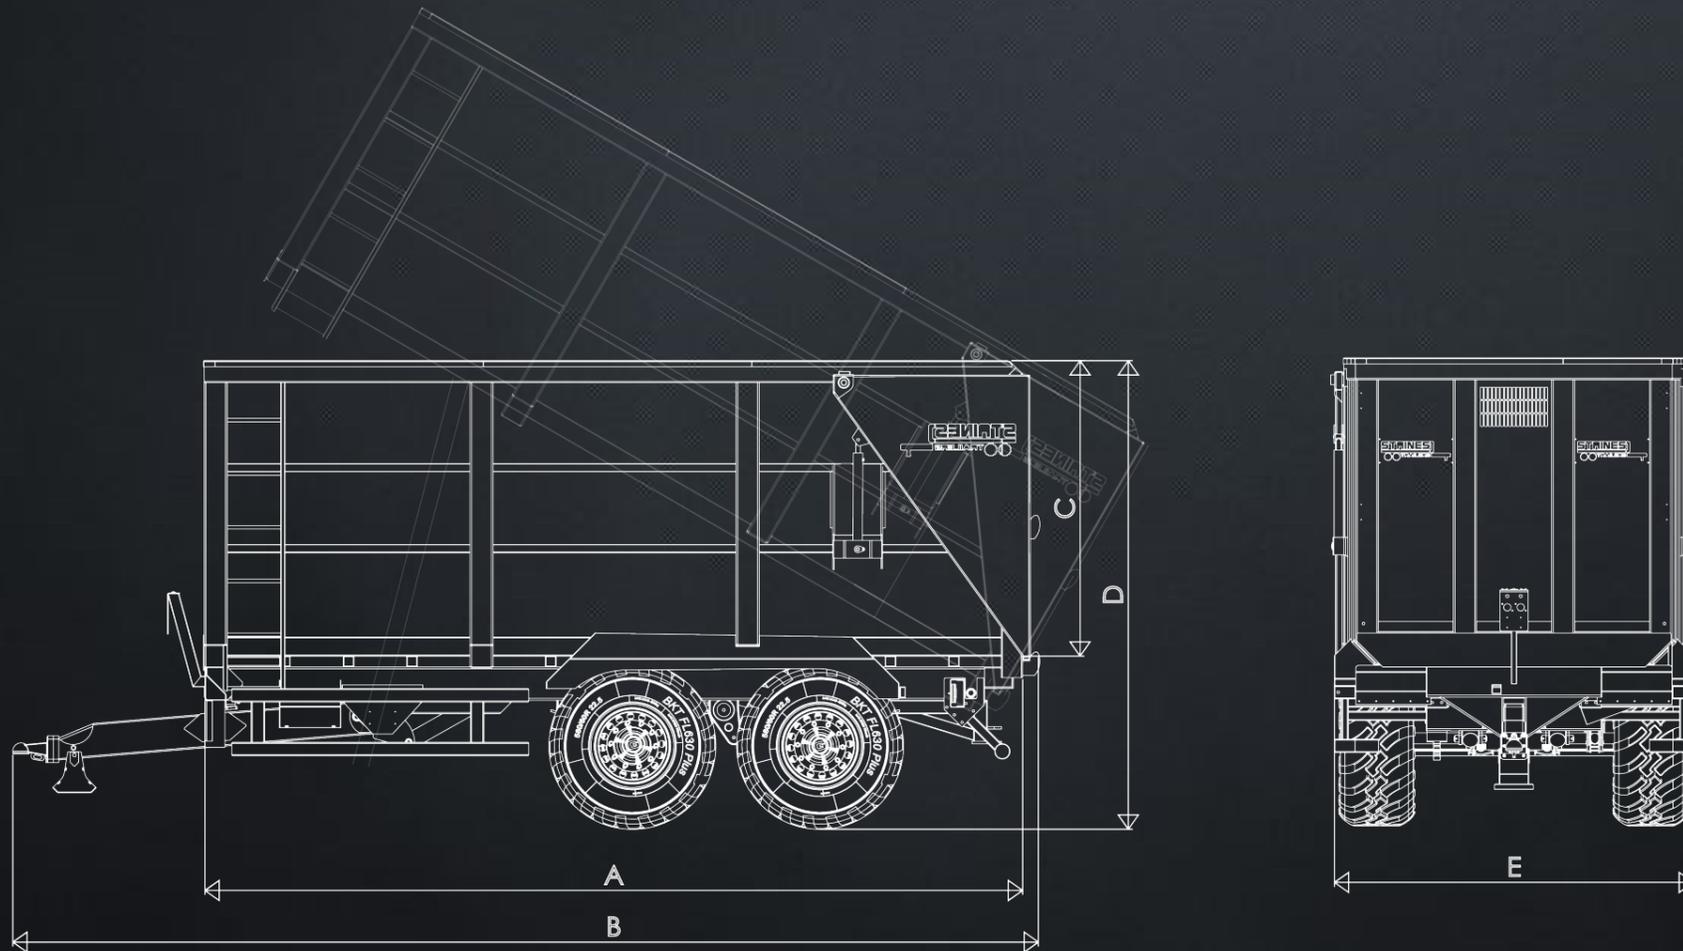

Our twin 3-stage tipping rams are the perfect addition to achieve an extensive tipping angle, assisting in fully unloading your haul.
